

## ANEET R. FONTES

Born: November 10, 1983, Isle de la Juventud, Cuba

Painter Aneet Fontes uses the lens of her memory in capturing the doorways, windows, lights and pathways of the bustling city streets. Since her departure from Cuba in 2011, Boston and Provincetown have captured her attention. She explores these places with excitement through the lens of a tourist. For her, visual complexity lies not only in architectural elements, but in the customs and patterns of each place's inhabitants.

In Fontes's words, "I am building the spaces and environments of the cities that are intertwined with each other, forming a network of rhythms and temporary transformations. The context is natural and ephemeral, real and sublime at the same time. Sidewalks, buildings, showcases, puddles and crystals reflect the other reality."
